3500/22M

Transient Data Interface (TDI) Module

The 3500/22M Transient Data Interface (TDI) is the interface between the 3500 monitoring system and compatible software (System 1 Condition Monitoring and Diagnostic software and 3500 System Configuration software). The TDI combines the function of a 3500/20 Rack Interface Module (RIM) with the data collection capability of a communication processor such as TDXnet.

A: Transient Data Interface Type

01 CSA/NRTL/C (Class 1, Division 2)

B: I/O Module Type

01 10Base-T/100Base-TX Ethernet

02 100Base-FX (Fiber Optic) Ethernet

03 10Base-T/100Base-TX Ethernet with gold-plated OK Relay contacts

04 100Base-FX (fiber optic) Ethernet with gold-plated OK Relay contacts

C: Agency Approval

00 None

01 CSA/NRTL/C (Class 1, Division 2)

02 Multi (CSA, ATEX, IECEx)

3500/22-AA-BB-CC

Spares

288055-01	Standard Transient DataInterface Module with USB cable
138607-01	Standard Transient Data InterfaceModule
146031-01	10Base-T/100Base-TX I/O Module
146031-02	100Base-FX (Fiber Optic) I/OModule

Amikon automation components-we deliver more for you! Regardless of the discontinued control system components, Amikon is committed to low cost, extending the life cycle of user control systems and reducing maintenance costs.
