Product Data Sheet

TPM810

Turbine Protection Interface Module

TYPE	REFERENCE	FAMILY	SCOPE
Turbine Protection Interface Module	**TPM810**	**800 Series Turbine / TP800**	**Scoped verified data**

ABB TPM810 is the application interface module in the TP800 turbine-protection arrangement. It receives and conditions field signals for the separate CPM810 processor, forming part of a modular assembly with the TBU810 terminal base rather than a complete protection package by itself.

01 DOCUMENTED PRODUCT REFERENCE

Module mounting	One slot in the TBU810 terminal base
Field termination	TBU810 terminal base

Evidence-limited technical summary; no unsupported electrical ratings added.

02 TECHNICAL DATA

Housing construction	Ventilated plug-in enclosure
Base connector	Recessed multirow pin connector

03 APPLICATION AND CONFIGURATION

- TPM810 and complete supplied marking
- Correct CPM810 and TBU810 assembly
- Protection and relay configuration comparison
- Qualified installation and functional acceptance
- Use the applicable manufacturer safety and installation instructions.

04 OFFICIAL DOCUMENTATION

ABB TP800 sales brochure Rev B and Symphony Plus product catalogue

Only the stated model-specific facts and explicitly scoped family data are summarized; unknown electrical ratings are excluded.

Independently prepared Amikon reference summary, not an original manufacturer manual. Ratings apply only under their documented conditions. Confirm the supplied marking and approved configuration before selection, installation or replacement.
