3500/05 RACK SPARES

Product Data Sheet

128276-01F 131151-01

Half-height front rack cover

RACK POSITION COVERAGE	FRONT INSCRIPTION	FASTENING ARRANGEMENT	SECONDARY PLATE IDENTIFICATION
Half-height vacant front position	**FUTURE EXPANSION**	**Two captive screws**	**128276-01F**

Bently Nevada 128276-01F 131151-01 is a half-height front cover for an unused position in a 3500/05 machinery-monitoring rack. The blue face is marked FUTURE EXPANSION. It is a mechanical rack-cover spare rather than an active electronic monitoring module.

01 TECHNICAL DATA

Rack position coverage	Half-height vacant front position
Front inscription	FUTURE EXPANSION
Fastening arrangement	Two captive screws
Secondary plate identification	128276-01F

Bently Nevada 3500/05 rack specification 141525-01 Rev. J; half-height blank front cover ordering entry, page 3; origina

02 ADDITIONAL PRODUCT DATA

Two captive screws secure the plate at the front opening. The photographed rear plate is marked 128276-01F and carries the Bently Nevada part number 131151-01. The half-height form allows a vacant front position to remain closed while preserving space for later rack expansion.

03 PRODUCT FUNCTION

Fit the half-height cover to the corresponding unused front opening in the 3500/05 rack. This part does not provide a signal channel or electronic interface.

04 SYSTEM COMPATIBILITY

The front inscription and rear part markings identify the mechanical cover. Retain both captive fasteners and match the opening height.

05 REFERENCE

Bently Nevada 3500/05 rack specification 141525-01 Rev. J; half-height blank front cover ordering entry, page 3; original part markings.
