Product Data Sheet

Bently Nevada 200152-XX-XX-XX MOD 323357-10-03-10
Modified accelerometer interface cable with connector on the accelerometer end

PRODUCT	THREAD	TOTAL LENGTH	SYSTEM
200150, 200155 and 200157 Accelerometers	Accelerometer-end molded connector	Exact length requires MOD-record confirmation	200150, 200155 and 200157 Accelerometers

Bently Nevada 200152-XX-XX-XX MOD 323357-10-03-10 is a Modified accelerometer interface cable with connector on the accelerometer end used as the sensing or signal component in the matching 200150, 200155 and 200157 Accelerometers system. Complete measurement requires compatible system components and the exact ordered electrical or loop configuration.

01

CURRENT PAGE PARAMETERS

Product Model	200152-XX-XX-XX MOD 323357-10-03-10
Product Parameters	Modified accelerometer interface cable assembly
Tariff Code	8544422900
Place of shipment	Xiamen, China
Base Part Number	200152
Configuration Fields	XX-XX-XX; verify from nameplate or factory record
Modification Reference	323357-10-03-10
Standard Cable Role	Connector on accelerometer end only
Accelerometer-End Connector	5-pin mating connector
Minimum Bend Radius	73.7 mm
Operating Temperature	-20 to +100 °C
Verification Rule	Confirm exact length, armor, connector ends and coupling nut

Source scope: official Bently Nevada 164986 Rev. Y, current product record, tariff and shipment fields. Technical configuration is limited to this exact model.

02 ORDERING CODE VERIFICATION

200152	Accelerometer interface cable with connector on accelerometer end only
XX-XX-XX	Unresolved configuration fields; use nameplate values
MOD	Separate factory modification marker
323357-10-03-10	Complete modification reference; preserve as supplied

03 SYSTEM ROLE AND APPLICATIONS

The ordered 200152-XX-XX-XX MOD 323357-10-03-10 configuration is used only with the compatible 200150, 200155 and 200157 Accelerometers system. Maintain the specified system length, mounting, connector or output, and approval option.

- Modified 20015x accelerometer cable replacement
- Accelerometer-to-monitor signal interconnection
- Maintenance of installed custom cable assemblies
- Screened sensor-power and vibration-signal routing

04 OFFICIAL INSTALLATION FACTS

- Use the specified Accelerometer-end molded connector mounting configuration.
- Maintain the ordered Exact length requires MOD-record confirmation system length.
- Preserve Accelerometer-end 5-pin mating connector and protect all connections.
- Use the manufacturer drawing and controlled procedure for installation.

05 OFFICIAL DOCUMENTATION

[200150, 200155 and 200157 Accelerometers System Datasheet - 164986 Rev. Y](#)

Controlled references remain in the official data sheet and manufacturer documentation. Obtain current revisions through the manufacturer media library.
