Preface

Purpose of the documentation

This manual supplements the ET 200SP distributed I/O system (http://support.automation.siemens.com/WW/view/en/58649293) system manual.

Functions that generally relate to the system are described in this manual.

The information provided in this manual and in the system/function manuals supports you in commissioning the ET 200SP distributed I/O system.

Conventions

Please also observe notes marked as follows:

Note

A note contains important information on the product described in the documentation, on the handling of the product or on the section of the documentation to which particular attention should be paid.

Security information

Siemens provides products and solutions with industrial security functions that support the secure operation of plants, solutions, machines, equipment and/or networks. They are important components in a holistic industrial security concept. With this in mind, Siemens' products and solutions undergo continuous development. Siemens recommends strongly that you regularly check for product updates.

For the secure operation of Siemens products and solutions, it is necessary to take suitable preventive action (e.g. cell protection concept) and integrate each component into a holistic, state-of-the-art industrial security concept. Third-party products that may be in use should also be considered. You can find more information about industrial security on the Internet (http://www.siemens.com/industrialsecurity).

To stay informed about product updates as they occur, sign up for a product-specific newsletter. You can find more information on the Internet (http://support.automation.siemens.com).

Table of contents

Preface **4**

1 ET 200SP Documentation Guide **6**

2 Product overview **8**

2.1 Properties 8

2.2 Functions 11
2.2.1 PROFIenergy 18
2.2.2 Use of fail-safe modules 18
2.2.3 Use of technology modules 18
2.2.4 Configuration control (option handling) 19

3 Wiring **20**

3.1 Pin assignment 20

3.2 Schematic circuit diagram 22

4 Parameters/address space **23**

4.1 Parameters 23

4.2 Explanation of parameters 23
4.2.1 Configuration control 23

4.3 Substitute value behavior 24

4.4 Status of the supply voltage L+ of the I/O modules 25

5 Interrupts, diagnostics, error, and system messages **26**

5.1 Status and error displays 26

5.2 Interrupts 31
5.2.1 Triggering of a diagnostics interrupt 31
5.2.2 Triggering a hardware interrupt 32
5.2.3 Triggering a swapping interrupt 32

5.3 Alarms 33
5.3.1 Diagnostics alarms 33
5.3.2 Maintenance events 34
5.3.3 Channel diagnostics 35
5.3.4 Invalid configuration states of the ET 200SP on PROFINET IO 39
5.3.5 Failure of supply voltage L+ at BaseUnit BU...D 39
5.3.6 STOP of the IO controller and recovery of the IO device 40

6 Compatibility **41**

7 Technical specifications **43**

A Dimension drawing **47**
