SC-20 SERIAL CONVERTERS

Product Data Sheet

SC-20 RS232/TTY

RS232 to TTY converter

SERIAL INTERFACE	CURRENT LOOP INTERFACE	SIGNAL CONVERSION	ASSEMBLY FORMAT
RS-232	**TTY**	**RS-232 to TTY**	**Inline cabled converter**

Sixing Electronics SC-20 RS232/TTY is an inline serial converter for connecting an RS-232 port to a TTY current loop interface. The cabled assembly provides a transition between the two signal interfaces in legacy installations.

01 TECHNICAL DATA

Serial interface	RS-232
Current loop interface	TTY
Signal conversion	RS-232 to TTY
Assembly format	Inline cabled converter

02 ADDITIONAL PRODUCT DATA

The RS-232 and TTY interfaces use different signalling methods. Verify the installed connector pin assignments and the active or passive current loop arrangement before selecting the converter for a particular connection.

03 PRODUCT FUNCTION

Identify which endpoint uses RS-232 and which uses the TTY current loop. Check the manuals for both connected devices to establish the signal assignments and connector orientation.

04 SYSTEM COMPATIBILITY

Confirm which endpoint supplies loop current before connecting the TTY side. Check the transmit and receive circuit assignment against the installed wiring drawing.
