ABB ACS580

Product Data Sheet

TINT-6511

Inverter power board

DRIVE SERIES REFERENCE	ASSEMBLY FORMAT	FAMILY
ABB ACS580	**Printed circuit board**	**ABB ACS580**

The ABB TINT-6511 is an inverter power board identified for certain ACS580 drives. It is an internal spare assembly for the drive power section.

01 TECHNICAL DATA

Drive series reference	ABB ACS580
Assembly format	Printed circuit board

TINT-6511 board identification and ACS580 series reference

02 ADDITIONAL PRODUCT DATA

The board is identified by its TINT-6511 marking and the separate assembly code on the label. The ACS580 family includes multiple drive and frame variants, so the board identification alone does not establish compatibility across the range.

03 PRODUCT FUNCTION

Record the ACS580 drive type code and frame size from the installed drive. Use these identifiers to locate the drive documentation and the spare-part reference for the installed power assembly.

04 SYSTEM COMPATIBILITY

Read the full TINT-6511 assembly code from the original board label and compare it with the offered unit. Verify the mounting and connector layout against the installed configuration.

05 REFERENCE

TINT-6511 board identification and ACS580 series reference
