TDC 3000 LCNP4M

Product Data Sheet

51403776-100

LCN interface board

BOARD DESIGNATION	NETWORK INTERFACE	NETWORK CHANNELS	HOST NODE TYPE
LCNP4M	**Local Control Network (LCN)**	**LCN A and LCN B**	**TDC 3000 PC node**

Honeywell 51403776-100 is an LCNP4M interface board for a TDC 3000 Local Control Network PC node. It provides the hardware connection between the host computer and the LCN.

01 TECHNICAL DATA

Board designation	LCNP4M
Network interface	Local Control Network (LCN)
Network channels	LCN A and LCN B
Host node type	TDC 3000 PC node
Printed board assembly marking	51403775-100 (observed configuration)

LCNP4M board identification and TDC 3000 LCN interface reference

02 ADDITIONAL PRODUCT DATA

The board is associated with LCN A and B connections. An identified specimen carries the board assembly marking 51403775-100. Hardware and firmware markings must be matched to the installed node because the specimen markings describe one configuration.

03 PRODUCT FUNCTION

Identify the TDC 3000 PC node and record the existing LCN A and B connections. Use the approved node documentation to check the host and interface hardware.

04 SYSTEM COMPATIBILITY

Record the installed LCNP4M hardware and firmware markings and compare them with the offered board. Retain the original node software and configuration records.

05 REFERENCE

LCNP4M board identification and TDC 3000 LCN interface reference
