SIMATIC ET 200PA SMART

Product Data Sheet

6ES7650-8EK70-0AA0

DO16 Digital Output Module

DIGITAL OUTPUTS	RATED LOAD VOLTAGE	RATED CHANNEL CURRENT	ISOLATION GROUPING
16	**24 V DC**	**0.5 A**	**16 outputs**

Siemens 6ES7650-8EK70-0AA0 is the DO16 Digital Output Module for SIMATIC ET 200PA SMART. The DO16 switches sixteen discrete loads in an ET 200PA SMART station and supports channel-specific substitute values.

01 TECHNICAL DATA

Digital outputs	16
Rated load voltage	24 V DC
Rated channel current	0.5 A
Isolation grouping	16 outputs
Configurable diagnostics	Supported
Diagnostic interrupt	Supported
Substitute values	Channel-specific
Coating option	Standard module

Siemens ET 200PA SMART Operating Instructions, section 10.3

02 ADDITIONAL PRODUCT DATA

Digital outputs is specified as 16. The published data also lists 24 V DC for rated load voltage and 0.5 A for rated channel current.

03 PRODUCT FUNCTION

The DO16 switches sixteen discrete loads in an ET 200PA SMART station and supports channel-specific substitute values. Review the host documentation for the installed SIMATIC ET 200PA SMART configuration.

04 SYSTEM COMPATIBILITY

Verify the IM 650 station, output wiring and the required diagnostic settings. Compare the project settings with the corresponding product ratings.
