ABB DCS601

Product Data Sheet

SDCD-POW-4 3ADT315100R1001

Coated Drive Power Supply Board

ABB MATERIAL NUMBER	MANUFACTURER DESIGNATION	CATALOGED HOST FAMILY	FAMILY
3ADT315100R1001	**SDCS-POW-4-COAT**	**DCS601**	**ABB DCS601**

ABB 3ADT315100R1001 identifies the coated SDCS-POW-4 board in the ABB parts catalog. ABB lists it as a spare for selected DCS601 drive configurations.

01 TECHNICAL DATA

ABB material number	3ADT315100R1001
Manufacturer designation	SDCS-POW-4-COAT
Cataloged host family	DCS601

02 ADDITIONAL PRODUCT DATA

The spare is identified by the ABB material number and the COAT designation. The catalog ties the board to individual DCS601 drive variants, so the drive type and the coating specification are relevant when selecting a replacement.

03 PRODUCT FUNCTION

ABB 3ADT315100R1001 identifies the coated SDCS-POW-4 board in the ABB parts catalog. ABB lists it as a spare for selected DCS601 drive configurations. Use ABB material number 3ADT315100R1001 to identify the coated board.

04 SYSTEM COMPATIBILITY

ABB designates 3ADT315100R1001 as SDCS-POW-4-COAT. The ABB accessory list includes selected DCS601 drive variants.
