EXPERION PKS C200

# Product Data Sheet

## TC-CEN011

Supervisory Ethernet Module

| HOST CONTROLLER | NETWORK SEGMENT | PEER DATA EXCHANGE | MANUFACTURER-DOCUMENTED STATUS |
|---|---|---|---|
| **C200** | **Ethernet Supervisory Network** | **C200 Exchange function blocks** | **Obsolete in R301.1** |

Honeywell TC-CEN011 is a supervisory Ethernet module documented for Experion PKS C200 control hardware. Honeywell identifies it as one option for peer-to-peer data exchange between the C200 and compatible Ethernet peers.

## 01 TECHNICAL DATA

| | |
|---|---|
| Host controller | C200 |
| Network segment | Ethernet Supervisory Network |
| Peer data exchange | C200 Exchange function blocks |
| Manufacturer-documented status | Obsolete in R301.1 |

## 02 ADDITIONAL PRODUCT DATA

The hardware guide specifies a separate Ethernet module for this exchange path and describes it in the context of the Ethernet Supervisory Network. TC-CEN011 is identified as obsolete in the referenced Honeywell guide.

## 03 PRODUCT FUNCTION

Honeywell TC-CEN011 is a supervisory Ethernet module documented for Experion PKS C200 control hardware. Honeywell identifies it as one option for peer-to-peer data exchange between the C200 and compatible Ethernet peers. It provides the separate supervisory Ethernet path documented for peer-to-peer Exchange blocks.

## 04 SYSTEM COMPATIBILITY

Honeywell describes the module on the Ethernet Supervisory Network. The planning guide names TC-CEN021 for the same documented path. Check the installed configuration and release before selecting a replacement.
