Gray PRO Base Adapter

SUPPORTED PRO DISPLAY FORMAT	ADAPTER FINISH	MOUNTING FASTENERS SUPPLIED	MECHANICAL INTERFACE
4:3	**Gray**	**4 screws**	**PRO base adapter**

Siemens 6AV7674-0KA00-0AA0 is the gray base adapter for SIMATIC HMI PRO devices with a 4:3 display format. The manufacturer identifies it as the mechanical base-adapter spare part and lists four mounting screws with the supply. It belongs to the mounting components for the fully enclosed PRO device arrangement.

01 TECHNICAL DATA

Supported PRO display format	4:3
Adapter finish	Gray
Mounting fasteners supplied	4 screws
Mechanical interface	PRO base adapter

02 ADDITIONAL PRODUCT DATA

This reference is distinct from the silver adapter specified for newer 16:9 PRO formats. Selection depends on the exact PRO device and its support-arm or pedestal interface rather than on an electrical signal rating. The adapter provides the mechanical connection; it is not an HMI panel, power supply or communication module.

03 PRODUCT FUNCTION

Confirm that the exact HMI PRO device uses the 4:3 gray base-adapter arrangement. The Siemens adapter information distinguishes this reference from the 16:9 silver version. Match the device operating instructions and the intended support-arm or pedestal connection before fitting the adapter.

04 SYSTEM COMPATIBILITY

Inspect the mating surfaces and use the specified mounting hardware and assembly sequence. The exact-model sheet lists four supplied fastening screws. Route the device cables through the intended mounting arrangement without pinching conductors or transferring unsupported loads to the HMI enclosure.

05 REFERENCE

Siemens 6AV7674-0KA00-0AA0 exact-model Data Sheet, 22 March 2022; Siemens PRO adapter product information A5E02275713-AH.
