SINAMICS S120 IPD SPARES

Product Data Sheet

6SL3353-3AG41-8BA0

Basic-line-module IPD spare card

ASSOCIATED BLM VOLTAGE CLASS	ASSOCIATED BLM CURRENT CLASS	ASSOCIATED BLM POWER CLASS	SUPPORTED COOLING CONSTRUCTION
500-690 V, three-phase AC	**1880 A**	**1500 kW**	**Air-cooled Basic Line Module**

Siemens 6SL3353-3AG41-8BA0 is an IPD spare card associated with the air-cooled SINAMICS S120 Basic Line Module. Its cross-checked identification specifies the 500-690 V three-phase, 1880 A, 1500 kW BLM class. These values identify the associated power module rather than a voltage or current to apply directly to the spare card.

01 TECHNICAL DATA

Associated BLM voltage class	500-690 V, three-phase AC
Associated BLM current class	1880 A
Associated BLM power class	1500 kW
Supported cooling construction	Air-cooled Basic Line Module

Cross-checked exact-article identification: IPD spare for air-cooled S120 BLM, 500-690 V / 1880 A / 1500 kW. Module rati

02 ADDITIONAL PRODUCT DATA

The article is a replacement electronic assembly, not the complete Basic Line Module. The full drive-module identity and the installed board revision determine its service applicability. Only the confirmed BLM association is stated here; card-level supply, connector pinout and operating limits have not been established.

03 PRODUCT FUNCTION

Identify the complete air-cooled S120 Basic Line Module and installed IPD assembly before planning service. The associated 500-690 V, 1880 A and 1500 kW classes identify the host module and are not board terminal ratings.

04 SYSTEM COMPATIBILITY

Use the service documentation and approved assembly list for the actual drive. Connector pin assignments, board-level power and parameter procedures must come from that matched documentation rather than from the host power-class figures.

05 REFERENCE

Cross-checked exact-article identification: IPD spare for air-cooled S120 BLM, 500-690 V / 1880 A / 1500 kW. Module ratings are not card supply ratings.
