ABB APOW POWER SUPPLY BOARDS

Product Data Sheet

APOW-01C

Coated drive power-supply board

ABB PRODUCT IDENTIFIER	BOARD PROTECTIVE FINISH	EARLIER PRODUCT IDENTIFIER	COMBINED SPARE-KIT IDENTIFIER
64605666	**Coated**	**64493663**	**68249457, APOW-01C plus NRED-61**

ABB APOW-01C is a coated power-supply electronic board identified by ABB product number 64605666. It is an internal drive spare assembly, distinct from a complete external power supply. The protective coating is part of this board configuration.

01 TECHNICAL DATA

ABB product identifier	64605666
Board protective finish	Coated
Earlier product identifier	64493663
Combined spare-kit identifier	68249457, APOW-01C plus NRED-61
Maintenance-kit association	ACS800-104 R8i preventive maintenance kits

ABB original product details 64605666, APOW-01C coated power-supply board and where-used kit identifiers.

02 ADDITIONAL PRODUCT DATA

The board is associated with ACS800-104 R8i maintenance kits and the combined APOW-01C/NRED-61 power-unit kit 68249457. ABB also links the assembly to the earlier product identifier 64493663. The individual board has an approximate net mass of 0.2 kg.

03 PRODUCT FUNCTION

Identify the coated APOW-01C board as ABB product 64605666 within the matched drive assembly. Retain the actual board revision and host service documentation.

04 SYSTEM COMPATIBILITY

Distinguish the individual board from kit 68249457, which also includes NRED-61. Host mains or power ratings do not define board connector-level limits.

05 REFERENCE

ABB original product details 64605666, APOW-01C coated power-supply board and where-used kit identifiers.
