3300 XL 8 MM

Product Data Sheet

162381-064-028-50-RU

Flexible proximity sensing probe

NOMINAL SENSING TIP SIZE	CASE THREAD	SENSING PRINCIPLE	FAMILY
8 mm	**3/8-24 UNF**	**Eddy current**	**3300 XL 8 mm**

Bently Nevada 162381-064-028-50-RU is a special flexible proximity probe associated with the 3300 XL 8 mm family. The manufacturer base-part listing identifies a flexible 3/8-24 probe rather than assigning the separate high-temperature armored construction to this base number.

01 TECHNICAL DATA

Nominal sensing tip size	8 mm
Case thread	3/8-24 UNF
Sensing principle	Eddy current

Bently Nevada 108M1756, May 2015, p.9: flexible-probe base descriptions; 141194 Rev. AM, p.1: common XL8 eddy-current pr

02 ADDITIONAL PRODUCT DATA

The 064-028-50-RU identity is retained in full. Its verified common features are the XL8 sensing family, flexible construction and 3/8-24 thread; the special dimensions, cable calibration and RU approval meaning remain unassigned.

03 PRODUCT FUNCTION

The complete 162381-064-028-50-RU identity belongs to the flexible XL8 probe group listed in the manufacturer approvals guide. The base-family description confirms an 8 mm probe and 3/8-24 thread, but the available source does not decode all special dimensions, cable selections or regional suffixes.

04 SYSTEM COMPATIBILITY

Use the installed configuration records to establish the actual flexible reach, lead length, calibration and connected Proximitor arrangement. Do not transfer dimensions or electrical settings from a standard rigid probe or another special flexible execution.

05 REFERENCE

Bently Nevada 108M1756, May 2015, p.9: flexible-probe base descriptions; 141194 Rev. AM, p.1: common XL8 eddy-current principle. Current 108M1756 Rev. AV confirms the base identifiers.
