Product Data Sheet

SIEMENS 6ES7232-4HB32-0XB0
SM 1232 two-channel analog output module

Siemens 6ES7232-4HB32-0XB0 is a SM 1232 two-channel analog output module in the SIMATIC S7-1200 product family. Two-channel S7-1200 analog output module supporting voltage and current output ranges with integrated diagnostics. Confirm the complete order number and installed system configuration before replacement.

01

OFFICIAL PRODUCT PARAMETERS

Manufacturer	Siemens
Order number	6ES7232-4HB32-0XB0
Product family	SIMATIC S7-1200
Product type	SM 1232 two-channel analog output module
Dimensions	4.5 x 10.0 x 7.5 cm
Net weight	0.149 kg
Output channels	2
Voltage range	+/-10 V
Current ranges	0 to 20 mA; 4 to 20 mA
Voltage resolution	14 bit
Current resolution	13 bit
Power dissipation	1.8 W
Maximum cable length	100 m

02

APPLICATION AND SELECTION NOTES

- Match the complete Siemens order number, hardware generation and firmware requirements.
- Confirm electrical ratings, channel type, wiring, connector and enclosure conditions.
- Use the applicable Siemens system manual and controlled machine documentation for configuration.
- Back up the existing program or hardware configuration before replacing a controller or module.
- Perform channel-by-channel functional tests before returning the machine to production.

03

IDENTIFICATION NOTICE

Use the complete order number 6ES7232-4HB32-0XB0. Similar-looking SIMATIC products may differ in supply voltage, I/O type, channel count, firmware, connector arrangement or approved application.
