ABB

MANUFACTURER	ORDER CODE	BOARD ID	EVIDENCE
ABB	3BHE036342R0101	XDD501A101	Limited

EVIDENCE BOUNDARY

The reviewed public ABB material does not name this exact board or provide its standalone electrical, mechanical or I/O specification. Do not infer those values from the system manual.

01

VERIFIED IDENTITY AND DOCUMENT STATUS

Manufacturer	ABB - product record identifier
Complete model	3BHE036342R0101 XD D501 A101
Order code	3BHE036342R0101
Alternate compact designation	XDD501A101
Exact-board ABB datasheet	Not located in the reviewed public ABB Library material
Electrical and I/O ratings	Not confirmed from an exact-board ABB source
Dimensions and weight	Not confirmed from an exact-board ABB source

02

OFFICIAL SYSTEM-LEVEL REFERENCE

ABB PCS6000 Service Manual 3BHS600000 E80 Rev F contains general service guidance for PCS6000 equipment and AC800PEC-related controller replacement. It does not identify 3BHE036342R0101 or XDD501A101.

Source	ABB PCS6000 Service Manual
Document number	3BHS600000 E80 Rev F
Relevant pages	85 and 90-91 of the PDF
Applicability	Only when project documentation confirms a PCS6000 / AC800PEC installation
Exact model named	No

03

PROCUREMENT AND REPLACEMENT CHECKS

- Match the complete order code and board designation on the installed unit.
- Confirm rack position, connector layout, hardware configuration and project drawings.
- Confirm compatible software or firmware and the approved replacement procedure with the system owner or ABB.
- Record cable and optical-fiber positions before disconnection; use qualified personnel and ESD controls.
- Do not energize or commission the replacement until the installed system documentation is confirmed.

04

OFFICIAL SOURCE AND LIMITATIONS

OPEN ABB PCS6000 SERVICE MANUAL

This Amikon document is an evidence-status and navigation aid. It is not an ABB-issued exact-board datasheet and does not replace controlled project drawings, safety procedures or an ABB compatibility decision.
