

SINAMICS DCM

Product Data Sheet

C98043-A7100-L4

Advanced CUD board

FUNCTION Advanced CUD board	FAMILY SINAMICS DCM	ORIGIN Germany	WEIGHT 0.4 kg
---------------------------------------	-------------------------------	--------------------------	-------------------------

Siemens SINAMICS C98043-A7100-L4 is a Advanced CUD board for the SINAMICS DCM. The values below are limited to the exact documented article.

01

VERIFIED TECHNICAL DATA

Component Class	Advanced CUD board
Drive Family	SINAMICS DCM
Primary Function	Provides advanced uncoated DC-drive control
Power Architecture	Advanced CUD platform
Voltage Class	24 V DC control supply
Current Rating	5 A maximum input
Power Section	CUD control slot
Mechanical Design	Uncoated circuit board
Electrical Interface	6RY1803-0GA00 connector board
Commissioning Check	Restore parameters and test assigned functions

- Service the|uncoated CUD slot: Use C98043-A7100-L4 to provides advanced uncoated dc-drive control in the documented SINAMICS DCM. Match 24 V DC control supply, 5 A maximum input and the installed cud control slot before work.
- Restore the|GA00 connector board: Record 6ry1803-0ga00 connector board, adjacent hardware, cable routing and grounding before removal. Preserve the exact connector orientation and mechanical arrangement while installing the L4 Advanced CUD.
- Complete the|advanced function test: Restore parameters and test assigned functions. Review Siemens drive diagnostics and record the final L4 Advanced CUD configuration before returning the affected machine function to service.

Match C98043-A7100-L4 to the installed SINAMICS DCM, complete wiring, mating hardware, revision and approved configuration. A similar article number does not establish direct interchangeability.
