

MICROMASTER 440 CHASSIS DRIVES

Product Data Sheet

6SL3351-6GE32-6AA1

MICROMASTER control interface board

FUNCTION	FAMILY	ORIGIN	WEIGHT
MICROMASTER control interface board	MICROMASTER 440 chassis drives	Germany	0.4 kg

Siemens MICROMASTER 6SL3351-6GE32-6AA1 is a MICROMASTER control interface board for the MICROMASTER 440 chassis drives. The values below are limited to the exact documented article.

01

VERIFIED TECHNICAL DATA

Component Class	MICROMASTER control interface board
Drive Family	MICROMASTER 440 chassis drives
Primary Function	Controls a high-voltage 260 A converter power section
Power Architecture	High-voltage CIB electronics
Voltage Class	500–600 V AC class
Current Rating	260 A drive class
Power Section	Chassis power section
Mechanical Design	Plug-in CIB assembly
Electrical Interface	Gate, current and auxiliary connectors
Commissioning Check	Check 260 A hardware and feedback response

- Apply the 260 A chassis stage: Use 6SL3351-6GE32-6AA1 to controls a high-voltage 260 a converter power section within the documented MICROMASTER 440 chassis drives. Confirm the chassis power section, electrical class and controlled system drawing before work.
- Prepare the feedback connector route: Record gate, current and auxiliary connectors, adjacent assemblies, cable routing, protective earth and configuration data. Preserve the exact 260 A high-voltage CIB arrangement during replacement.
- Complete the high-voltage release test: Check 260 A hardware and feedback response. Review Siemens diagnostics and record the final 260 A high-voltage CIB result before returning the affected function to service.

Match 6SL3351-6GE32-6AA1 to the installed MICROMASTER 440 chassis drives, complete wiring, mating hardware, revision and approved configuration. A similar article number does not establish direct interchangeability.
