

SIMOVERT MASTERDRIVES

Product Data Sheet

6SE7037-0EK84-1JC2

Inverter control interface module

FUNCTION Inverter control interface module	FAMILY SIMOVERT MASTERDRIVES	ORIGIN Germany	WEIGHT 0.8 kg
---	---------------------------------	-------------------	------------------

Siemens SIMOVERT 6SE7037-0EK84-1JC2 is a Inverter control interface module for the SIMOVERT MASTERDRIVES. The values below are limited to the exact documented article.

01

VERIFIED TECHNICAL DATA

Component Class	Inverter control interface module
Drive Family	SIMOVERT MASTERDRIVES
Primary Function	Controls phase switching and evaluates power-stage feedback
Power Architecture	EK84 inverter electronics
Voltage Class	500–600 V AC class
Current Rating	High-current converter class
Power Section	Inverter power section
Mechanical Design	Plug-in control module
Electrical Interface	Gate, current and DC-link connectors
Commissioning Check	Check phase gates, scaling and diagnostics

- Apply the|phase switching control: Use 6SE7037-0EK84-1JC2 to controls phase switching and evaluates power-stage feedback within the documented SIMOVERT MASTERDRIVES. Confirm the inverter power section, electrical class and controlled system drawing before work.
- Prepare the|current feedback route: Record gate, current and dc-link connectors, adjacent assemblies, cable routing, protective earth and configuration data. Preserve the exact 6SE7037 EK84 module arrangement during replacement.
- Complete the|inverter diagnostic test: Check phase gates, scaling and diagnostics. Review Siemens diagnostics and record the final 6SE7037 EK84 module result before returning the affected function to service.

Match 6SE7037-0EK84-1JC2 to the installed SIMOVERT MASTERDRIVES, complete wiring, mating hardware, revision and approved configuration. A similar article number does not establish direct interchangeability.
