|---------------------------------|----------------------------------|-------------------|------------------|

Siemens SINAMICS A5E02268102 is a drive board service for the SINAMICS drive systems. The values below are limited to the exact documented article.

01

## VERIFIED TECHNICAL DATA

|                      |                                                      |
|----------------------|------------------------------------------------------|
| Component Class      | drive board service                                  |
| Drive Family         | SINAMICS drive systems                               |
| Primary Function     | Provides the documented drive board service function |
| Power Architecture   | A5E02268102 industrial architecture                  |
| Voltage Class        | Installed equipment voltage class                    |
| Current Rating       | Model-specific channel current                       |
| Control Supply       | 24 V DC control class                                |
| Power Section        | SINAMICS drive systems service section               |
| Mechanical Design    | A5E02268102 service assembly                         |
| Electrical Interface | A5E02268102 keyed connector set                      |

## ADDITIONAL PRODUCT DATA

|                     |                                               |
|---------------------|-----------------------------------------------|
| Cooling Integration | SINAMICS drive systems cooling practice       |
| Board Designation   | A5E02268102 exact designation                 |
| Service Role        | A5E02268102 maintenance role                  |
| Product Status      | A5E02268102 identity verification             |
| Commissioning Check | Validate A5E02268102 diagnostics and function |

## OFFICIAL APPLICATIONS

- Apply the drive board service: Use A5E02268102 to provide the documented drive board service function within the documented SINAMICS drive systems. Confirm its electrical class, installed position and controlled equipment drawings before work.
- Match the A5E02268102 keyed connector set: Record connector keying, cable labels, shielding, protective earth and adjacent assemblies. Preserve the documented interface and mechanical arrangement during exchange.
- Validate the restored function: After installation, run the applicable diagnostics, verify the connected equipment response and record the final acceptance results before returning the system to service.

## SYSTEM COMPATIBILITY

Match A5E02268102 to the installed SINAMICS drive systems, complete wiring, mating hardware, revision and approved configuration. A similar article number does not establish direct interchangeability.
