OFFICIAL APPLICATIONS

- Install the 15-foot cable assembly: Apply 16710-15 where the controlled layout calls for 4.57 m of armored 22 AWG cable from the casing accelerometer to terminal lugs.
- Relieve strain at both cable ends: Seat the 3-socket plug without twisting the sensor, support the armor, identify every terminal lug and keep the shield termination consistent with the drawing.
- Document the restored sensor path: After replacement, record cable identity and route, verify shield continuity and sensor bias, and compare the vibration signal with the pre-work baseline.

SYSTEM COMPATIBILITY

Match 16710-15 to the installed 330400 and 330425 accelerometer system, complete wiring, mating hardware, revision and approved configuration. A similar article number does not establish direct interchangeability.
