

SIMADYN D CONTROL SYSTEMS

Product Data Sheet

021620-B

industrial control circuit board

FUNCTION industrial control circuit board	FAMILY SIMADYN D control systems	ORIGIN Germany	WEIGHT 1.6 kg
--	-------------------------------------	-------------------	------------------

Siemens Simatic S7 021620-B is a industrial control circuit board for the SIMADYN D control systems. The values below are limited to the exact documented article.

01

VERIFIED TECHNICAL DATA

Manufacturer	Siemens
Order Number	021620-B
Product Type	Industrial Control Circuit Board
Product Family	SIMADYN D control systems
Country of Origin	Germany
Supply Voltage	24 V DC
Backplane Interface	SIMATIC system bus
Installation	Control cabinet
Protection Class	IP20
Configuration	STEP 7 engineering

- Use 021620-B in its documented control function: Apply 021620-B in the specified SIMADYN D control systems position and confirm the complete Siemens order number, installed hardware revision, power supply and approved engineering project before service.
- Record the installed interface arrangement: Photograph terminal labels, connector keying, network or signal cabling, shields, protective earth and neighboring modules. Preserve the documented slot and configuration during exchange.
- Test the affected automation function: After fitting 021620-B, restore the controlled project, review module diagnostics and test the affected I/O, HMI, network, weighing or drive function at a safe operating point. Record final acceptance results.

Match 021620-B to the installed SIMADYN D control systems, complete wiring, mating hardware, revision and approved configuration. A similar article number does not establish direct interchangeability.
