# Product Data Sheet

**6ES7515-2FM02-0AB0**

fail-safe central processing unit

|                                   |                            |         |          |
|-----------------------------------|----------------------------|---------|----------|
| FUNCTION                          | FAMILY                     | ORIGIN  | WEIGHT   |
| fail-safe central processing unit | SIMATIC automation systems | Germany | 0.587 kg |

Siemens SIMATIC S7 6ES7515-2FM02-0AB0 is a fail-safe central processing unit for the SIMATIC automation systems. The values below are limited to the exact documented article.

01

## VERIFIED TECHNICAL DATA

|                                 |                         |
|---------------------------------|-------------------------|
| HW functional status            | FS01                    |
| Firmware version                | V2.9                    |
| Rated value (DC)                | 24 V                    |
| Screen diagonal [cm]            | 6.1 cm                  |
| Number of keys                  | 8                       |
| integrated (for program)        | 750 kbyte               |
| integrated (for data)           | 3 Mbyte                 |
| Number of ports                 | 2                       |
| Interface types Number of ports | 1                       |
| horizontal installation, min.   | -25 °C; No condensation |

## ADDITIONAL PRODUCT DATA

---

## OFFICIAL APPLICATIONS

---

- Execute deterministic automation sequences: Use 6ES7515-2FM02-0AB0 for cyclic logic, program execution and distributed I/O coordination in the documented SIMATIC automation systems. Preserve the approved hardware configuration and program backup.
- Connect configured PROFINET or PROFIBUS devices: Maintain the documented network names, addresses, topology and controller interfaces assigned to 6ES7515-2FM02-0AB0. Validate reachable devices before enabling controlled equipment.
- Restore the controller project safely: Load the approved project to 6ES7515-2FM02-0AB0, review diagnostics and test interlocks, I/O updates, alarms and commanded sequences before returning the plant section to service.

## SYSTEM COMPATIBILITY

---

Match 6ES7515-2FM02-0AB0 to the installed SIMATIC automation systems, complete wiring, mating hardware, revision and approved configuration. A similar article number does not establish direct interchangeability.
