Product Data Sheet

6FM1726-3CA00

positioning control module

FUNCTION positioning control module	FAMILY SIMATIC automation modules	ORIGIN Germany	WEIGHT 1 kg
--	--------------------------------------	-------------------	----------------

Siemens SIMATIC S7 6FM1726-3CA00 is a positioning control module for the SIMATIC automation modules. The values below are limited to the exact documented article.

01

VERIFIED TECHNICAL DATA

Controller Type	WF 715
Control Function	Shaft cam control
Module Format	S5 rack module
Position Input	Incremental encoder
Digital Outputs	Cam switching outputs
Control Supply	Backplane supplied
Mounting	Automation rack
Protection Class	IP20
Programming	Parameter set
Diagnostic Mode	Module status

- Use the documented positioning control module: Apply 6FM1726-3CA00 only in the manufacturer-specified SIMATIC automation modules position. Match the complete article number, electrical interfaces and adjacent hardware before service.
- Preserve interfaces and module position: Record connector keying, terminal assignments, shields, protective earth and neighboring assemblies for 6FM1726-3CA00; restore the same controlled arrangement during installation.
- Validate the restored control function: After installing 6FM1726-3CA00, review system diagnostics and test the affected signals, communication or controlled equipment at a safe operating point. Record the final acceptance results.

Match 6FM1726-3CA00 to the installed SIMATIC automation modules, complete wiring, mating hardware, revision and approved configuration. A similar article number does not establish direct interchangeability.
