

PANELVIEW PLUS 1000 TERMINALS

Product Data Sheet

2711P-K10C4D1

PanelView Plus operator terminal

FUNCTION	FAMILY	ORIGIN	WEIGHT
PanelView Plus operator terminal	PanelView Plus 1000 terminals	United States	4.2 kg

Allen-Bradley PanelView 2711P-K10C4D1 is a PanelView Plus operator terminal for the PanelView Plus 1000 terminals. The values below are limited to the exact documented article.

01

VERIFIED TECHNICAL DATA

Display Size	10.4 in
Display Type	Color TFT LCD
Resolution	640 x 480 pixels
Color Depth	18-bit color
Operator Input	Keypad
Input Voltage	24 V DC
Ethernet Interface	10/100 Mbit/s EtherNet/IP
Serial Interface	RS-232
Application Flash	64 MB
USB Function	USB printing support

- Display machine status and process values: Use 2711P-K10C4D1 for the approved PanelView Plus 1000 application screens, status indications and navigation. Restore the correct FactoryTalk View ME project and communication settings.
- Operate configured keypad commands safely: Verify every function, numeric and navigation key assigned to 2711P-K10C4D1. Confirm alarms, acknowledgements and commands reach the intended controller tags without unintended equipment movement.
- Validate display and communications: After installing 2711P-K10C4D1, test display quality, keypad response, EtherNet/IP or serial communication, user access and the affected machine sequence before production use.

Match 2711P-K10C4D1 to the installed PanelView Plus 1000 terminals, complete wiring, mating hardware, revision and approved configuration. A similar article number does not establish direct interchangeability.
