OFFICIAL APPLICATIONS

- Operate the documented analog output module: Use 07AA60R1 in the specified Procontic T200 position with the documented supply, signal range and system interface. Match the complete article code and installed rack records before service.
- Restore every documented connection: Record terminal numbers, connector keying, rack position, shields and protective earth for 07AA60R1. Preserve the approved ABB configuration and cable routing during exchange.
- Validate the restored control function: After fitting 07AA60R1, check power and module diagnostics, then test the affected I/O, communication, controller or measurement function at a safe operating point and record acceptance.

SYSTEM COMPATIBILITY

Match 07AA60R1 to the installed Procontic T200, complete wiring, mating hardware, revision and approved configuration. A similar article number does not establish direct interchangeability.
