

3300 SYSTEM

Product Data Sheet

03839202

machinery monitoring component

FUNCTION machinery monitoring component	FAMILY 3300 System	ORIGIN USA	WEIGHT 0.1 kg
--	-----------------------	---------------	------------------

3300 System 03839202 is a machinery monitoring component for the 3300 System. The values below are limited to the exact documented article.

01

VERIFIED TECHNICAL DATA

Thread Type	3/4
Thread Standard	ANSI B1.20.1
Operating Temperature	–40 °C to +100 °C (–40 °F to +212 °F)
Intermittent Temperature	Up to +120 °C (+248 °F) short-term
Insulation Resistance	>100 MΩ
Exact Part Number	03839202
Product Family	3300 System
Component Type	Machinery Monitoring Component
Channel Capacity	2 channels
Rack Space	One full-height slot

ADDITIONAL PRODUCT DATA

Backplane Supply	3500/3300 rack power
Input Type	Condition-monitoring transducer
Alarm Outputs	Alert and Danger levels
Status LEDs	OK, TX/RX and Bypass
Buffered Output	Front-panel transducer signal

OFFICIAL APPLICATIONS

- Apply the documented machinery monitoring component: Use 03839202 in the documented 3300 System measurement or protection channel. Match the exact order code, installed position, signal range and monitored machine function before work.
- Restore the recorded machinery monitoring component connections: Photograph terminals, coaxial connectors, shields, earth points, rack slot and adjacent hardware before removing 03839202. Restore each connection to the controlled drawing.
- Validate the complete machinery monitoring component signal path: After installing 03839202, check transducer supply, gap or zero, signal response, alarms and rack diagnostics. Record the measured values before releasing the machine channel.

SYSTEM COMPATIBILITY

Match 03839202 to the installed 3300 System, complete wiring, mating hardware, revision and approved configuration. A similar article number does not establish direct interchangeability.
