proximity probe assembly

FUNCTION proximity probe assembly	FAMILY 3300 System	ORIGIN USA	WEIGHT 0.04 kg
---	------------------------------	----------------------	--------------------------

3300 System 10030-05-30-05-02 is a proximity probe assembly for the 3300 System. The values below are limited to the exact documented article.

01

VERIFIED TECHNICAL DATA

Standard Electronics	-30°C to +100°C (-22°F to +212°F)
Extended Range	Up to +150°C (302°F)
Storage Temperature	-50°C to +120°C (-58°F to +248°F)
Exact Part Number	10030-05-30-05-02
Product Family	3300 System
Component Type	Proximity Probe Assembly
Measurement Principle	Eddy-current proximity sensing
Nominal Probe Tip	8 mm sensor family
Power Supply	-17.5 to -26 V DC
Scale Factor	7.87 V/mm nominal

Linear Range	0.25 to 2.30 mm
Frequency Response	0 to 10 kHz
Target Material	AISI 4140 steel
Cable Impedance	75 ohm triaxial
Output Resistance	50 ohm nominal

- Apply the documented proximity probe assembly: Use 10030-05-30-05-02 in the documented 3300 System measurement or protection channel. Match the exact order code, installed position, signal range and monitored machine function before work.
- Restore the recorded proximity probe assembly connections: Photograph terminals, coaxial connectors, shields, earth points, rack slot and adjacent hardware before removing 10030-05-30-05-02. Restore each connection to the controlled drawing.
- Validate the complete proximity probe assembly signal path: After installing 10030-05-30-05-02, check transducer supply, gap or zero, signal response, alarms and rack diagnostics. Record the measured values before releasing the machine channel.

Match 10030-05-30-05-02 to the installed 3300 System, complete wiring, mating hardware, revision and approved configuration. A similar article number does not establish direct interchangeability.
