OFFICIAL APPLICATIONS

- Apply the documented proximity transducer component: Use 24710-080-01 in the documented 7200 Proximity Transducer Systems measurement or protection channel. Match the exact order code, installed position, signal range and monitored machine function before work.
- Restore the recorded proximity transducer component connections: Photograph terminals, coaxial connectors, shields, earth points, rack slot and adjacent hardware before removing 24710-080-01. Restore each connection to the controlled drawing.
- Validate the complete proximity transducer component signal path: After installing 24710-080-01, check transducer supply, gap or zero, signal response, alarms and rack diagnostics. Record the measured values before releasing the machine channel.

SYSTEM COMPATIBILITY

Match 24710-080-01 to the installed 7200 Proximity Transducer Systems, complete wiring, mating hardware, revision and approved configuration. A similar article number does not establish direct interchangeability.
