OFFICIAL APPLICATIONS

- Apply the documented machinery monitoring module: Use 3300/61-03-01-01-00-00-00 in the documented 3300 System measurement or protection channel. Match the exact order code, installed position, signal range and monitored machine function before work.
- Restore the recorded machinery monitoring module connections: Photograph terminals, coaxial connectors, shields, earth points, rack slot and adjacent hardware before removing 3300/61-03-01-01-00-00-00. Restore each connection to the controlled drawing.
- Validate the complete machinery monitoring module signal path: After installing 3300/61-03-01-01-00-00-00, check transducer supply, gap or zero, signal response, alarms and rack diagnostics. Record the measured values before releasing the machine channel.

SYSTEM COMPATIBILITY

Match 3300/61-03-01-01-00-00-00 to the installed 3300 System, complete wiring, mating hardware, revision and approved configuration. A similar article number does not establish direct interchangeability.
