OFFICIAL APPLICATIONS

- Apply the documented proximity transducer component: Use JNJ5300-08-045-00-00 in the documented 3300 XL 8 mm Proximity Transducer measurement or protection channel. Match the exact order code, installed position, signal range and monitored machine function before work.
- Restore the recorded proximity transducer component connections: Photograph terminals, coaxial connectors, shields, earth points, rack slot and adjacent hardware before removing JNJ5300-08-045-00-00. Restore each connection to the controlled drawing.
- Validate the complete proximity transducer component signal path: After installing JNJ5300-08-045-00-00, check transducer supply, gap or zero, signal response, alarms and rack diagnostics. Record the measured values before releasing the machine channel.

SYSTEM COMPATIBILITY

Match JNJ5300-08-045-00-00 to the installed 3300 XL 8 mm Proximity Transducer, complete wiring, mating hardware, revision and approved configuration. A similar article number does not establish direct interchangeability.
