Product Data Sheet

ICS Triplex T8235

Trusted power slot cover

TYPE	LOCATION	HOST	PURPOSE
Power Shield	Spare pack slot	Power shelf	Slot coverage

ICS Triplex T8235 is the Power Shield identified in the Trusted power-system product range. It covers a power-pack position when the shelf is not fully populated. This is a slot-cover accessory, not the power pack that supplies the DC output.

01

PRODUCT IDENTITY AND SPECIFICATIONS

Product model	T8235
Documented purpose	Covers unused power-pack positions

02 TECHNICAL DATA

Documented host shelves	T8230 and T8240 power-shelf ranges; match the actual spare position
-------------------------	---

03 APPLICATION AND CONFIGURATION

- T8235 covers a spare power-pack position in a partially populated power shelf. The manufacturer lists it separately from the power packs, Power Port, controller and support brackets; it has no documented conversion rating.
- Match the T8235 identity and actual unused power-pack position. Do not substitute a general rack blanking plate or infer dimensions, materials, fastening or electrical ratings from the power packs.
- Ratings describe the documented equipment, not packed dimensions, shipping weight or a certified supplied-unit origin.

04 OFFICIAL DOCUMENTATION

PD-T824X Issue 11 | Trusted Power System

PDF p. 11: T8235 identity; p. 13: spare pack positions and unused rack space; p. 37: Power Shields. PD-T823X Issue 11 also lists T8235 on PDF p. 11.

Independent Amikon reference, not an OEM manual. Use the complete manufacturer instructions matching the actual hardware and firmware. No manufacturer pages are reproduced.
