Warnings and Caution Notes as Used in this Publication

WARNING

Warning notices are used in this publication to emphasize that hazardous voltages, currents, temperatures, or other conditions that could cause personal injury exist in this equipment or may be associated with its use.

In situations where inattention could cause either personal injury or damage to equipment, a Warning notice is used.

CAUTION

Caution notices are used where equipment might be damaged if care is not taken.

Note: Notes merely call attention to information that is especially significant to understanding and operating the equipment.

These instructions do not purport to cover all details or variations in equipment, nor to provide for every possible contingency to be met during installation, operation, and maintenance. The information is supplied for informational purposes only, and Emerson makes no warranty as to the accuracy of the information included herein. Changes, modifications, and/or improvements to equipment and specifications are made periodically and these changes may or may not be reflected herein. It is understood that Emerson may make changes, modifications, or improvements to the equipment referenced herein or to the document itself at any time. This document is intended for trained personnel familiar with the Emerson products referenced herein.

Emerson may have patents or pending patent applications covering subject matter in this document. The furnishing of this document does not provide any license whatsoever to any of these patents.

Emerson provides the following document and the information included therein as-is and without warranty of any kind, expressed or implied, including but not limited to any implied statutory warranty of merchantability or fitness for particular purpose.

Section 1: Introduction

This manual contains general information about PACSystems CPU operation and product features.

Section 1 provides a **general introduction** to the PACSystems family of products, including new features, product overviews, and a list of related documentation.

CPU Features & Specifications are provided in Section 2:.

Installation procedures for the different platforms are described in their respective manuals as given below:

1. *PACSystems RX7i Installation Manual*, GFK-2223.
2. *PACSystems RX3i System Manual*, GFK-2314.
3. *RSTi-EP User Manual*, GFK-2958.

CPU Programming is covered in *PACSystems RX3i and RSTi-EP CPU Programmer's Reference Manual*, GFK-2950. It provides an overview of program structure and describes the various languages which may be used, their syntax and operation, and provides examples.

CPU Configuration is described in Section 3:.. Configuration using the proprietary PAC Machine Edition™ (PME) programming and configuration software package determines characteristics of CPU, System and module operation. It also establishes the program references used by each module in the system. For details on configuration of RX3i Ethernet Interface modules, refer to *PACSystems RX3i and RSTi-EP TCP/IP Ethernet Communications User Manual*, GFK-2224.

CPU Operation is described in Section 4:..

Ethernet Communications and Serial Communications are described in Section 5:..

Serial I/O, SNP & RTU Protocols are described in Section 6:..

Performance Data, including Instruction Timing, is provided in Appendix.A:..

User Memory Allocation is described in A-1.20.

2.2 RX3i CPU Features and Specifications

	CPU310	CPU315	CPU320/ CRU320 ²⁰	CPE302 ²¹ / CPE305	CPE310	CPE330	CPE400/ CPL410
Lifecycle Phase	Discontinued - use CPE310	Discontinued - use CPE310 or CPE330	Discontinued - use CPE330	Active	Active	Active	Active
