

ACS800 DRIVE CONTROL

Product Data Sheet

RDCU-12C

drive control unit

FUNCTION drive control unit	FAMILY ACS800 drive control	ORIGIN Switzerland	WEIGHT 0.80 kg
--------------------------------	--------------------------------	-----------------------	-------------------

ABB Drives RDCU-12C is a drive control unit for the ACS800 drive control. The values below are limited to the exact documented article.

01

VERIFIED TECHNICAL DATA

ABB Product ID	3AUA0000036521
Catalog Description	RDCU-12C control unit
Ordering Unit	1 piece
Minimum Order	Single unit
Part Classification	New spare part
Surface Protection	Coated assembly
Application Software	Ordered separately
Drive Compatibility	ACS800 industrial drives
Control Board Role	Drive control processing
Software Loading	Required before commissioning

- Compression and pipeline terminals: Equipment Monitoring Systems
- Blending and reactor process units: Production Interface Systems
- Clean utility production suites: Material Handling Systems

Match RDCU-12C to the installed ACS800 drive control, complete wiring, mating hardware, revision and approved configuration. A similar article number does not establish direct interchangeability.
