Introduction

Purpose of this manual

This manual provides all the necessary information for configuring, installing, connecting and commissioning the PN/PN Coupler.

Required basic knowledge

The following knowledge is required in order to understand the manual:

- General knowledge in the field of automation technology
- Knowledge of the use of computers or PC -like tools (e.g. programming devices) under the Windows operating system.
- Knowledge of working with STEP 7 You can find information on this topic in the STEP 7 online help.

Scope of the manual

This manual is valid for PN/PN Coupler V4.2 and V6.0 with article number 6ES7158-3AD10-OXA0.

This manual contains a description of the components that were valid at the time the manual was published. We reserve the right to include up-to-date Product Information with new components and new versions of components.

Recycling and disposal

The PN/PN Coupler is low in contaminants and can therefore be recycled. For environmentally friendly recycling and disposal of your old equipment, contact a certified electronic waste disposal company and dispose of the equipment according to the applicable regulations in your country.
