

ABB 70BK02 CONTROL ASSEMBLIES

Product Data Sheet

HESG332160R1 70BK02B-E

logic circuit board

FUNCTION logic circuit board	FAMILY ABB 70BK02 control assemblies	ORIGIN Switzerland	WEIGHT 0.80 kg
---------------------------------	---	-----------------------	-------------------

ABB HESG332160R1 70BK02B-E is a logic circuit board for the ABB 70BK02 control assemblies. The values below are limited to the exact documented article.

01

VERIFIED TECHNICAL DATA

Assembly Reference	HESG332160R1
Type Code	70BK02B-E
Secondary Reference	HE664369-318/2
Baseboard Reference	HESG450334P201
Baseboard Revision	AEND A
Program Device 1	HESG441191R4
Program Device 2	HESG492076A
Logic Memory	Sharp LH5116-15

ADDITIONAL PRODUCT DATA

OFFICIAL APPLICATIONS

- Plant logic interface racks: Logic Processing Systems
- Unit control logic cabinets: Process Logic Systems
- Mill auxiliary control racks: Machine Logic Systems

SYSTEM COMPATIBILITY

Match HESG332160R1 70BK02B-E to the installed ABB 70BK02 control assemblies, complete wiring, mating hardware, revision and approved configuration. A similar article number does not establish direct interchangeability.
