|-----------------------------------------------|-------------------------------|-------------------------|-------------------|

GE VersaMax IC200ALG322 is a four-channel analog output module for the VersaMax analog I/O. The values below are limited to the exact documented article.

01

## VERIFIED TECHNICAL DATA

|                   |                    |
|-------------------|--------------------|
| Output Channels   | 4                  |
| Output Types      | Voltage or current |
| Voltage Range     | 0 to 10 V DC       |
| Current Range     | 4 to 20 mA         |
| Resolution        | 12 bits            |
| Update Rate       | 0.3 ms maximum     |
| Supply Range      | 18 to 30 V DC      |
| Backplane Current | 50 mA at 5 V DC    |

- Batch preparation and transfer areas: Process Control Systems
- Raw water intake and pumping stations: Plant Utility Systems
- Boiler feed and auxiliary plants: Equipment Monitoring Systems

Match IC200ALG322 to the installed VersaMax analog I/O, complete wiring, mating hardware, revision and approved configuration. A similar article number does not establish direct interchangeability.
