

VERSAMAX ANALOG I/O

Product Data Sheet

IC200ALG230D

four-channel analog input module

FUNCTION four-channel analog input module	FAMILY VersaMax analog I/O	ORIGIN United States	WEIGHT 0.80 kg
--	-------------------------------	-------------------------	-------------------

GE VersaMax IC200ALG230D is a four-channel analog input module for the VersaMax analog I/O. The values below are limited to the exact documented article.

01

VERIFIED TECHNICAL DATA

Input Channels	4
Input Range	0 to 10 V DC
Resolution	12 bits
Update Rate	0.3 ms maximum
Input Impedance	Greater than 100 kΩ
Accuracy at 25 °C	±0.25% full scale
Backplane Current	50 mA at 5 V DC
Isolation	250 V AC field-to-logic
Status LED	Module OK

- Refinery separation and storage areas: Drive Coordination Systems
- Solvent recovery and dosing rooms: Quality Inspection Systems
- Sterile filling and packaging cells: Process Control Systems

Match IC200ALG230D to the installed VersaMax analog I/O, complete wiring, mating hardware, revision and approved configuration. A similar article number does not establish direct interchangeability.
