|------------------------------------------------|--------------------------------------|-------------------------|-------------------|

GE PACSystems RX3i IC694ALG392 is a eight-channel analog output module for the PACSystems RX3i analog I/O. The values below are limited to the exact documented article.

01

## VERIFIED TECHNICAL DATA

|                   |                               |
|-------------------|-------------------------------|
| Output Channels   | 8                             |
| Output Types      | Voltage or current            |
| Voltage Ranges    | 0–10 V; $\pm 10$ V            |
| Current Ranges    | 0–20 mA; 4–20 mA              |
| Resolution        | 12 bits                       |
| Update Rate       | 12 ms maximum                 |
| External Supply   | 24 V DC                       |
| Backplane Current | 110 mA at 5 V DC              |
| Field Isolation   | 1,500 V AC                    |
| Output Default    | Hold last or configured value |

- Body assembly and inspection cells: Material Handling Systems
- Crushing and grinding process lines: Safety Interlock Systems
- Stock preparation and drying sections: Machine Control Systems

Match IC694ALG392 to the installed PACSystems RX3i analog I/O, complete wiring, mating hardware, revision and approved configuration. A similar article number does not establish direct interchangeability.
