## ICS Triplex T8191

Trusted Single Slot Shield

|                    |        |               |               |
|--------------------|--------|---------------|---------------|
| TYPE               | WIDTH  | HOST          | RATING        |
| Passive slot cover | 1 slot | T8100 / T8300 | N/A in source |

T8191 is the Trusted single-width shield identified by the manufacturer as a blanking accessory for unused chassis slots. It is a passive cover, not a processor, communication interface or input/output module, and does not add control channels.

01

## PRODUCT IDENTITY AND SPECIFICATIONS

|                           |                                         |
|---------------------------|-----------------------------------------|
| Product model             | T8191                                   |
| Documented accessory type | Trusted shield / chassis blanking plate |
| Slot width                | 1 slot                                  |

02 TECHNICAL DATA

|                             |                                                                     |
|-----------------------------|---------------------------------------------------------------------|
| Documented chassis context  | T8100 Processor Chassis or T8300 Expander Chassis; unused positions |
| Electrical rating in source | N/A; passive module blank                                           |

03 APPLICATION AND CONFIGURATION

- Power Generation: Electricity Generation at Gas Fired and Combined Cycle Facilities.
- Oil & Gas: Petroleum Extraction, Gas Treatment and Hydrocarbon Processing Facilities.
- Chemical Processing: Bulk Chemical Manufacturing and Specialty Product Production Areas.

04 OFFICIAL DOCUMENTATION

ICSTT-CT013 | IECEx ULD 17.0001X | Issue 19, 25 February 2026

Manufacturer-hosted IECEx certificate PDF p. 3: unused-slot requirements; PDF p. 8: exact model and slot width. Full chassis procedure remains necessary.

ICSTT-PC002G | Trusted Product Information | December 2025

Independent Amikon reference, not an OEM manual. Use the complete manufacturer instructions matching the actual hardware and firmware. No manufacturer pages are reproduced.
