

OC 6000E

Product Data Sheet

BAO21 369B1871G5003

Analog output terminal base

MARKED SUPPLY VOLTAGE	NETWORK CONNECTION HARDWARE	MODULE MATING INTERFACE	ANALOG OUTPUT CHANNELS
24 V DC	2 shielded RJ45 sockets	3 multipole board receptacles	8 mA/V channels

General Electric BAO21 369B1871G5003 is an eight-channel current/voltage analog-output base for compatible OC 6000e output electronics. It provides the module and field-connection interface for configured analog control circuits in industrial power and process-control equipment.

01

VERIFIED TECHNICAL DATA

Marked supply voltage	24 V DC
Network connection hardware	2 shielded RJ45 sockets
Module mating interface	3 multipole board receptacles
Analog output channels	8 mA/V channels
Field termination capacity	24 removable terminal positions
Chassis fixing points	4 panel mounting holes
Module retention	2 rotary locking cams
Grounding connection	1 protective-earth clamping point
Rail retention	Spring-latch DIN rail fixing

ADDITIONAL PRODUCT DATA

Naked product size	17.30 x 12.50 x 4.80 cm
Naked product weight	0.35kg

DOCUMENTED USE SETTINGS

Electricity Generation and Industrial Heat Supply: Electric Power Generation.

Chemical Manufacturing and Petrochemical Production: Industrial Chemical Manufacturing.

Petroleum Production and Natural Gas Processing: Oil Production and Processing.

SYSTEM COMPATIBILITY

General Electric BAO21 369B1871G5003 is an eight-channel current/voltage analog-output base for compatible OC 6000e output electronics. It provides the module and field-connection interface for configured analog control circuits in industrial power and process-control equipment.
