OC 6000E

Product Data Sheet

MAO10 369B1842G5001

Eight-channel analog output module

NOMINAL MODULE SUPPLY	POWER INDICATION	OPERATING INDICATION	FAULT INDICATION
24 V DC, OC 6000e I/O family	**1 Power LED**	**1 Run LED**	**2 LEDs: Int Error / Ext Fail**

General Electric MAO10 369B1842G5001 is an eight-channel analog output module in the OC 6000e I/O family for providing configured current or voltage command signals in industrial process control.

01 VERIFIED TECHNICAL DATA

Nominal module supply	24 V DC, OC 6000e I/O family
Power indication	1 Power LED
Operating indication	1 Run LED
Fault indication	2 LEDs: Int Error / Ext Fail
Network indication	2 LEDs: Tx/Rx A / Tx/Rx B
Module retention	2 rotary locking tabs
Analog output channels	8
Current output span	0 to 20 mA
Voltage output span	0 to 10 V

Values follow the unit photographs and applicable documents identified on page 2.

02 ADDITIONAL PRODUCT DATA

Naked product size	7.00 x 13.20 x 15.20 cm
Naked product weight	0.60kg

03 DOCUMENTED USE SETTINGS

Electric Power Generation and Heat Production: Thermal Electric Power Generation.

Industrial Chemical and Petrochemical Production: Industrial Chemical Manufacturing.

Petroleum Production and Natural Gas Processing: Oil Production and Processing.

04 SYSTEM COMPATIBILITY

General Electric MAO10 369B1842G5001 is an eight-channel analog output module in the OC 6000e I/O family for providing configured current or voltage command signals in industrial process control.

05 PRODUCT EVIDENCE

Exact-unit photographs and independently checked product information
