Product Data Sheet

SAFT127CHC

Drive Chopper Control Board

TYPE	REFERENCE	FAMILY	SCOPE
Drive Chopper Control Board	**SAFT127CHC**	**Stromberg / SAFT**	**Scoped verified data**

ABB SAFT127CHC is a chopper-control circuit board in the Stromberg SAFT drive-electronics range. It combines control circuitry and a ribbon-cable interface on an open board, with its chopper-control identity distinguished from the separate power switching assembly.

01 DOCUMENTED PRODUCT REFERENCE

Board construction	Open printed-circuit assembly
Ribbon-cable connection	Shrouded dual-row header

Physical-interface reference; electrical input/output ratings are not established.

02 TECHNICAL DATA

Secondary connection	Board-edge pin header
Adjustment hardware	Board-mounted adjustable components

03 APPLICATION AND CONFIGURATION

- SAFT127CHC and complete supplied marking
- Ribbon and secondary connection comparison
- Drive-specific drawing and control settings
- Qualified installation and functional acceptance
- Use the applicable manufacturer safety and installation instructions.

04 PRODUCT IDENTIFICATION SOURCES

Original SAFT127CHC board markings; OEM 1352C renewal-parts identification

Chopper-control identity follows OEM renewal parts table24. Structure follows original SAFT127CHC photos. Component markings are not board ratings; no matched manufacturer PDF is available.

Independently prepared Amikon reference summary, not an original manufacturer manual. Ratings apply only under their documented conditions. Confirm the supplied marking and approved configuration before selection, installation or replacement.
